

## Classic Fusion White Chrono

This is a refined watch Classic Fusion pure white as snow. White diamonds, white dial, white strap, the Hublot "Art of Fusion" philosophy goes all white - as magic and eternal, so feminine and elegant, summertime or wintertime.

It takes inspiration from the codes of traditional watchmaking while displaying Hublot's trademark modernity. Part of the Classic Fusion collection characterised by softer, more classic lines, this is the Classic Fusion Chronograph White.

This timepiece comes into 2 different references, from an elegant sporty Titanium Chronograph version to a King Gold (extra-precious gold containing 5% platinum) Chronograph version, totalizing 42 white diamonds for 1.35 carat for the bezel.

The watch has an aesthetically pleasing diameter of 42 mm. Designed for men and women, it is also designed to please connoisseurs with its HUB1100 self-winding mechanical chronograph movement (155 components – 28'800 A/h) featuring a date with a rectangular window at 6 o'clock and a power reserve of 42 hours.

Finally, the ensemble is completed with a white strap with a deployant buckle, in white alligator leather sewn onto tone-on-tone rubber for comfort, flexibility and increased durability of the leather. Water resistant to 5 ATM, i.e. 50 metres.

### Technical details

References	541.NE.2010.LR.1104 (Titanium White Chrono) 541.OE.2080.LR.1104 (King Gold White Chrono)
