

FOR IMMEDIATE RELEASE

RGM Releases New Option For Its Popular 151 Model

(USA, Mount Joy, PA) February 24, 2016

RGM has announced a new model in its automatic pilots' watch lineup – RGM Model 151-PR “Professional Pilot.”

This new model has a very technical but traditional pilot style dial with large Super-Luminova numbers for low light visibility. Two versions are available: one with a date window at 3 o'clock and a more period look without a date. The dial displays hours 1 thru 12 and the minutes 5 thru 60. The dial and second hand have red accents which blend nicely with the classic rhodium finished sword style hands.

A prominent element of all 151 models is the American-made stainless steel case, or option titanium case. Each case part is cut from a solid block of 316L surgical stainless steel or aircraft quality titanium. The 151-PR is a functional, technical and aesthetically pleasing pilot watch which fits very comfortably on the wrist. It is a welcome addition to the RGM 151 lineup of technical Pilot watches.

About RGM

Since 1992, RGM Watch Company has provided quality, luxury and complicated timepieces to a variety of clientele. Located in historic Lancaster County, Pennsylvania, RGM is the only watch company to produce a high-grade mechanical movement in a series in the United States since the late 1960's. In addition to producing their own high-grade watches, RGM has been chosen by museums, note collectors, auction houses, and watch companies to service and restore rare and exclusive watches. To learn more about the variety of services that RGM offers, please visit www.rgmwatches.com.
